

Entrega 02: Webhook - Stripe avisa cuando el pago se realizó

3. Conexión de Stripe CLI al entorno local

Descripción: Ejecución de la herramienta Stripe CLI en la terminal para redirigir los eventos de cobro hacia el endpoint local (localhost:3003/payments/webhook), escuchando el evento charge.succeeded.

```
nahuel@nahuel-IdeaPad-1-14ADA7:~/Escritorio/facultad/Facultad 3er año/programacion avanzada/apirestcrud/api-rest-crud-user-nestjs$ stripe listen --forward-to localhost:3003/payments/webhook --events charge.succeeded
> Ready! You are using Stripe API Version [2026-08-26.dahlia]. Your webhook signing secret is whsec_65323f89febccc09ebd00c06ac7328fa2ffacbef31f4d0ed084b061a785717ba (^C to quit)
2026-09-23 19:11:21 --> charge.succeeded [evt_3UIyNo23D6VuuVv8032J8sPa]
2026-09-23 19:11:21 <-- [200] POST http://localhost:3003/payments/webhook [evt_3UIyNo23D6VuuVv8032J8sPa]
```

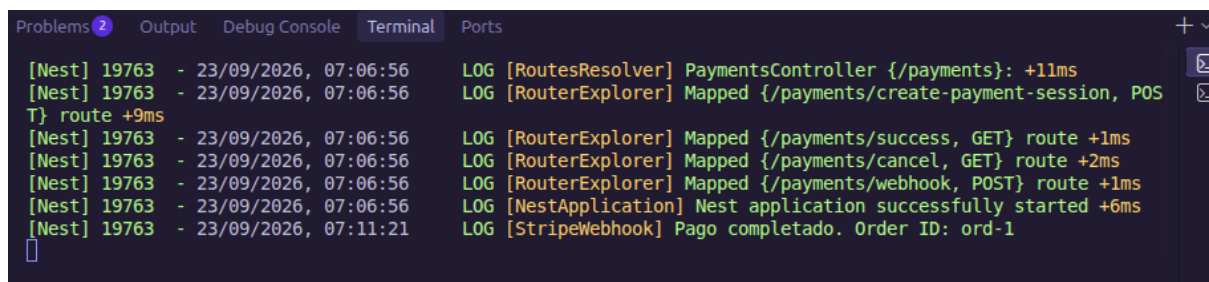

localhost:3003/payments/success

Dar formato al texto ☐

```
{"ok":true,"message":"Payment successful"}
```

4. Recepción del evento en el microservicio (Log de confirmación)

Descripción: Registro en la consola del servidor NestJS confirmando que el webhook recibió correctamente la firma válida, procesó el evento de pago exitoso y extrajo el orderId desde la metadata.

```
